

# Transport to the College – 2024 and beyond

## School Bus Services

As part of the college online enrolment application form, we are asking parents and caregivers to request assistance with transport if it may be needed. This will help the college to work with Brougham Buses to establish school bus routes through our enrolment zone and cater for as many students as possible. This work will commence in April 2023 and proposed routes will be published on the school web site soon afterwards.

## Train Services

Current plans show that a new railway station will be situated around 200 metres from the school named Ngaakooroa / Drury West. This station is planned to be operational from 2025 and will be a further transport option for students.

## Own Transport

The college is situated on Burt Road in Drury, minutes from the SH1 motorway. Current plans show parking bays by the side of the school site for families to be able to drop students off safely.
